#### **2. NAME OF THE VETERINARY MEDICINAL PRODUCT**

**OPTIPRIME**

powder for oral solution

sulfadiazine and trimethoprim

(1g+200mg)/10g

for lambs and kids

#### **3. STATEMENT OF THE ACTIVE SUBSTANCES AND OTHER INGREDIENTS**

10 g of powder contain:

**Active substances:**, 10g Sulfadiazine , 200mg Trimethoprim

**Excipients:** Cetrимide, Lactose monohydrate

#### **4. INDICATIONS**

OPTIPRIME powder for oral solution is indicated for the treatment of the bacterial diarrhoea of lambs and kids.

#### **5. CONTRAINDICATIONS**

Do not administer to ruminating animals with a functional rumen.

#### **6. ADVERSE REACTIONS**

Sulfonamides' toxicity is relatively small. Rarely and after long term high dosing administration, may the following occur: hypersensitivity reactions (urticaria, hemolytic anemia, skin rash), kidney damages, gastrointestinal disturbances (nausea, vomiting), aplastic anemia, granulocytopenia, thrombocytopenia, hepatitis and jaundice.

The frequency of adverse reactions is defined using the following convention:

- very common (more than 1 in 10 animals treated displaying adverse reaction(s))
- common (more than 1 but less than 10 animals in 100 animals treated)
- uncommon (more than 1 but less than 10 animals in 1,000 animals treated)
- rare (more than 1 but less than 10 animals in 10,000 animals treated)
- very rare (less than 1 animal in 10,000 animals treated, including isolated reports).

If you notice any side effects, even those not already listed in this package leaflet or you think that the medicine has not worked, please inform your veterinary surgeon.
